SCOTT ISLIP ROUND ENGINEERING INC 10 SEGWUN RD WATERDOWN ON L8B 0K6 CA

Service Request Type.: BPV-National BC

Service Request No.: 2269798 Your Reference No.: R-0851

Registered to.: DSS VALVE PRODUCTS INC.

Dear SCOTT ISLIP,

Please find enclosed the original response from BC, registered under the CRN No.: 0C18279.251.

As all jurisdictional fees are handled by the Technical Standards and Safety Authority (TSSA), you do not pay any jurisdictions directly.

Should you have any questions or require further assistance, I will be happy to assist you. For general enquiries, please contact a Customer Service Advisor at 1.877.682.TSSA (8772) or e-mail customerservices@tssa.org. When contacting TSSA regarding this file, please refer to the Service Request number provided above.

Yours truly,

Joanna Karpinski

TECHNICAL STANDARDS & SAFETY AUTHORITY 345 CARLINGVIEW DRIVE TORONTO ON M9W 6N9

Account #: 35231

Journal #: 70603

Attn: TANYA FRANCIS

Re: Application for Design Registration

The design, as detailed in your, TSSA SR# 2269798, for a Fitting is accepted for registration as follows:

Registered To: DSS VALVES

CRN:

0C18279.251

Drawing #: R-0851

Drawing Revision: 0

Conditions Of Registration:

Registration of Model SSKGV & DBB Valves Sizes 2"-36" per att'd scope of registration sheets (2 pages). This design was registered based on a technical review performed by the province of initial registration in accordance with the Association of Chief Inspectors policy on reciprocal recognition of design review.

Reviewer's Notes:

Design codes are ASME B16.34 and ASME B313. As required by CSA B51 4.2.1, this registration expires on February 05, 2028. This CRN is valid until the expiry date as long as the Manufacturer maintains a valid quality control program verified by an acceptable third-party agency until that date. Should the certification of the quality control program lapse before the expiry date, this registration shall become void.

Contact me if you have any questions. The invoice for registration will be forwarded under separate cover.

SHARON PETERS

| 17-4 PH - ASTM A747 Grade CB7Cu-1 UNS J92180 | 290 | 750 | 1500 |

Note 1: In all cases the pressure-temperature ratings of the valves may be limited by the seat and seal materials. Consult literature.

Note 2: Products that are to operate at low temperatures shall conform to the rules of the applicable codes under which they are used.

Note 3: For valve materials not listed in ASME B16.34 the maximum allowable working temperature of the valves is limited by the valve material and the published valve material allowable stress values in the ASME B31.3 and/or ASME Section II Part D Codes. Materials with no published elevated temperature properties are limited to 100F maximum operating temperature when used under this CRN.

Note 4: In all cases the pressure-temperature ratings of a flanged valve are limited by the pressure-temperature rating of the flange.

Note 5: See Chart 1 for calculated Maximum Allowable Working Pressure (MAWP) at 100F for various valve pressure classes and materials.
